## VERTICAL LIFT INSURANCE

# THERE IS A LOT RIDING ON YOUR INSURANCE

At Bryson Insurance, we take the time to educate underwriters about the extensive regulations that govern the Vertical Lift Industry – a step that secures the best-possible insurance rates for our clients.

We have even created a customized insurance package for the companies that design, manufacture, sell, modernize, install, maintain and repair vertical transportation equipment.

It's because we understand the coverage that your business requires. We have the specialists that can provide you with answers and options:

- ♦ explaining what a policy will actually cover;
- ♦ deciphering co-insurance clauses that determine your costs if a claim is under-insured;
- ♦ helping you understand the difference between General Liability and Umbrella liability policies;
- ♦ and describing the protection offered through non-owned automobile coverage and tool floater endorsements.

**Call our Vertical Lift Industry specialist at 1-800-661-5196, ext. 242 to see if your business is properly protected.**

And let us show you the insurance you can depend on.

# VERTICAL LIFT INSURANCE
